Co-chair and speaker introductions

Camilla Burrow

Camilla Burrow is the Chief Executive of Wild Oxfordshire, a charity seeking to create a more natural, resilient, and biodiverse Oxfordshire for the benefit of all. Wild Oxfordshire helps catalyse change by identifying conservation needs and supporting nature recovery action across the County, in partnership with individuals, communities and organisations. Camilla's other nature recovery leadership roles include being Chair of the OLNP Board, Chair of the Engagement & Communications working group for Oxfordshire's Local Nature Recovery Strategy (LNRS), and vice-Chair of the Oxfordshire Environment Board.

Louisa Chenicer

Louisa Chenciner is an academic public health doctor with demonstrated experience in climate health and social protection. She is a current NIHR Academic Clinical Fellow in Public Health Medicine and Junior Research Fellow at the Centre for Personalised Medicine, St Anne's College, University of Oxford. Louisa's work spans academia and real-world public health, with experience across the NHS, local government, and the UK Health Security Agency. She is currently developing a programme of research focussed on green spaces in hospital settings, and is also a keen and committed gardener.

Laura McCarthy Green Spaces Coordinator at Oxford Health NHS Foundation Trust. She has a background as a Landscape Architect and Horticulturalist and is a member of the Chartered Institute of Horticulture. Laura works with staff and service users to improve the grounds and gardens for well-being and nature recovery.

Dan Loveard is Green Space for Health Project Lead at the [Centre for Sustainable Healthcare](#). Dan is an experienced project manager working across the environment and health sectors, leading nature-based projects from strategy through to delivery to support healthier communities and a healthier planet. Dan is involved in the management of a variety of projects through the [NHS Forest programme](#), supporting healthcare sites integrate biodiversity and green space into their estates and care pathways, benefiting both people and nature. He currently works on the Healthy by Nature programme, supporting Nature Recovery Rangers embedded within NHS Trusts to strengthen the role of nature in prevention, recovery and community engagement. His work spans stakeholder partnership and engagement, research, resource development and training.
